Carlos, It really should not take any funding for me to use the server. I worked for ORD for 9 years, and my Lab Director used to tell me that I was providing too much tech assistant to Superfund Sites, that I should work on a research team studying why frogs were dying. I am not kidding about this.

Gary,

Yes, we will get funding for this work.

Although it is my understanding that ORD has funding to provide assistance to the Regions.

I am not sure what or how much funding would be needed to use the server. CAS

Earl,

Please take a stab at answering the technical/information questions below.

Carlos - funds available?

Thanks,

Gary Miller

Additional questions that need to be answered in order to ensure we are properly analyzing your needs and provide the best support possible(Other questions may come from others copied on this email):

*   Are funds available to support your request?

*   What are the details of the project? If possible, please provide a web link to the project.

*   Is this a Region 6 specific project?

*   Is ORD working on this project as well?

*   Please explain the reasoning behind hosting with ORD vs NCC per Mike McDowell's question in his email below?

*   If a server is required, what are the specification requirements, i.e., storage space, processing speed, memory requirements, software required, type of compiler, etc.?

*   How long will this requirement last?

*   Per Mike McDowell's email below as well, is this an internal to EPA only process (meaning not access publicly)?

Subject: RE: Request for server assistance

If the data must be accessed by personnel outside the EPA, it needs to be hosted on a server provided by OEI at the NCC. I've copied Bhagya Subramanian and Nancy Broom who can help with that.

Please let me know if it turns out the data only need to be accessed from inside the EPA. The data can go on an ORD server in that case.

Thanks

Subject: RE: Request for server assistance

Yes, we have individuals in Regions accessing data on our ORD servers already.

The specifics will have to come from our Enterprise Operations Division who I copied on my previous emails. They are the ones who help jump these hurdles and determine if we have the server space to allocate.

I have copied the Acting Director of EOD so he may follow up with your question, however he will not be back until Friday.

Subject: RE: Request for server assistance

Hi Rick-

Thank you for the speedy reply. What I'm really asking here is to host data that is not ORD's. Some technical answers are needed before we run to the Service Catalog for IT/IM services for ORD.
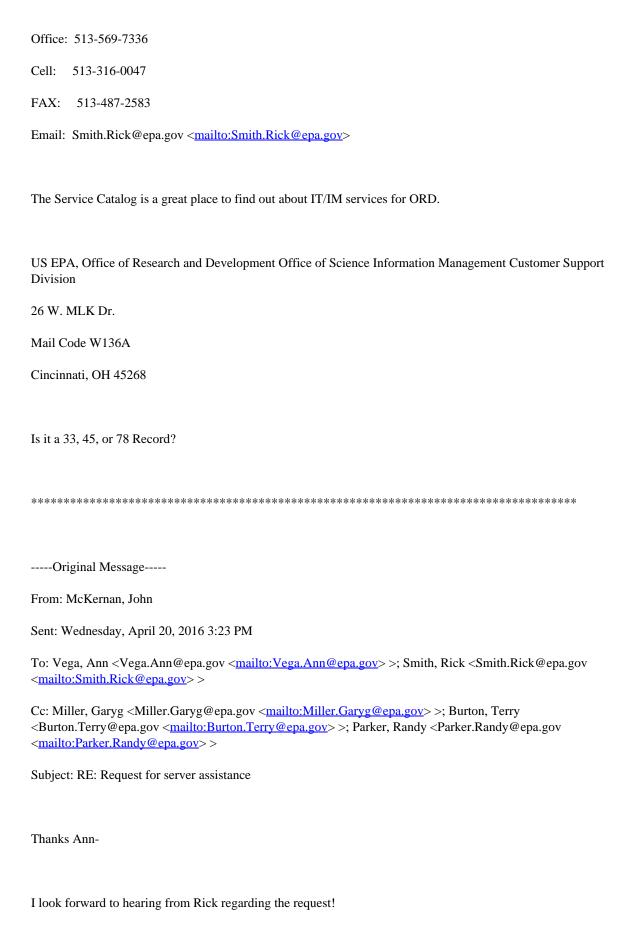

The main question here is : If I want to help EPA Region 6 and the U.S. Army Corps by hosting their data on one of our ORD servers, can they even access it?? They are outside of the ORD firewall. And, U.S. Army Corps is a different Federal agency... There are so many restrictions on accessing our ORD servers, I question if we can even pass the access hurdle.

Thank you for your technical help,

John

Subject: RE: Request for server assistance

Hi Ann-

I received this request from Terry Burton in EPA Region 6. He is asking if we (ORD) could host some server capability to help with the San Jacinto Waste Pits site. Are you the right person to help out with this? If not, who might be?

Some supporting info we would need for this request:

1) Can they access EPA servers from outside?

2) How much server space do they need ?

Thank you in advance for your help!

John

Hi Gary,

      This note is to let you know that Randy Parker of ORD's Cincinnati office is looking into whether ORD could host some server capability to help with the San Jacinto Waste Pits site. Randy is also very knowledgeable on funding arrangements and agreements, so he would be able to provide great advice there. I've copied Randy so that he knows you are the RPM in question. He will get back with us when he gets an answer. Thanks.
